Technique: Basketweave Beading

- The first step, regardless of whether you are covering a horizontal or a vertical canvas thread is to come up in the lower left hand hole, go through the bead, then back down in the upper right hand hole. This is a classic tent stitch. The bead will slant from the lower left to the upper right.
- When covering a horizontal thread, come back up in the upper left hand hole, go through the bottom of the bead (the end nearest the lower left hand hole,) and then go back down in the lower right hand hole. This will “pull” the bead into a horizontal position.
- Moving just like basketweave, continue to apply any beads covering horizontal threads in that diagonal row.
- When covering a vertical thread, follow the first step. For the second step, come up in the lower right hand hole, go through the bottom of the bead (again, the end nearest the lower left hand hole) and then go back down in the upper left hand hole. This will

“pull” the bead into a vertical position.

- Moving just like basketweave, continue to apply beads covering vertical threads in that diagonal row.
- Once an area is complete, you may need to “scoot” the beads on the outer edge for tightly packed coverage.
